SECURITY INFORMATION

SECRET

BCFEEND/BCFLUNE Progress Report, 15 January 1952 - 15 February 1952.

A. Radio

1. Program Content: HTGrubby broadcast daily in the period 15 January to 15 February 1952. The lack of intelligence from inside the country has precluded the use of any material for the ideal type of program; however, some material can be gleaned by rearing in between the lines of Identity (1) and monitoring Radio Lyceum. The farce of the second state loan as a voluntary desire of the KWaahoos has been stressed in the broadcasts of January 29, February 6, 7, and 8. Other themes stressed were the coming Identity (2) on the transmissions of January 19 and February 2. The proposed installation on the Identity (3) was also dealt with on 5 February.

2. Transmission Time: Starting with 31 January, our regular 6:30 broadcast is being repeated at 9:00 p.m. that same evening and at 1:30 p.m. the next day. We hope this will increase our audience considerably.

3. Jamming: There is still no definite information as to whether or not we are being jammed, and consequently no counter-measures have been taken until new tests in the future definitely determine the presence or absence of jamming.

4. Reception: KWaahoos in QKDimple reported last week that they heard HTGrubby clearly for the first time. We hope that the increase in effective sunlight hours has also improved reception in KWaahoo as our technicians have predicted.

5. Personnel: HTGrubby faces a shortage of personnel in the next few months because RMDrawer is leaving for TPCredo for an operation for ulcers, [redacted] is leaving for BCBiddy to work for the ZRCrowns until August 1952. [redacted] has informed [redacted] he is contemplating taking advantage of his PBPrime visa, [redacted] has been plagued with severe headaches the cause of which doctors have been unable to determine as yet, consequently his work on HTGrubby has been limited; and there is a possibility that [redacted] may have to be operated on for a gall bladder condition. For that reason several Waahoos will be submitted for clearance at once.

B. BCBegood.

The Second BCBegood drop was successfully carried out on 24 January in the Identity (4) area. No report on the effect of the drop has been received to date.

C. Leaflets.

We have been informed that it will only be about two months before a building can be erected next to the new Pyrex installation for housing the photographic and printing equipment for leaflet production. [redacted] is therefore drawing up plans and obtaining estimates for the building which will also house the photographic laboratory of DYClip in addition to the BCFLUNE equipment.

AIR SUPPORT SECTION

Reported activities for the period 15 January - 15 February 1952

1. Covert

- a. 20 Jan. BCBegood - weather abort.
- b. 21 Jan. BCBegood - completed one-half of mission, 1500 lbs. delivered over northern KMWashoo
- c. 22 Jan. BCBegood - weather abort.

2. Overt

- a. 23 Jan. BCFiend - to Komctini and return; transport five covert personnel.
- b. 24-29 Jan. JBEdict - to BCBiddy, HTStein and return; transport of aircrew on regular leave. Thirteen personnel from LCDrink to BCBiddy; 4 personnel from BCBiddy to HTStein; three personnel and 1500 lbs. JBEdict cargo from HTStein to LCDrink.
- c. 13-22 Feb. BCFiend/JBEdict - two BCFiend personnel from TPCredo to HTStein; eight covert aircrew from BCBiddy to LCDrink.

FROM:

SUBJECT: Monthly Survey Report - BGFIED
15 January - 15 February 1952

1. Air Operations

a. 21 January - First half of second BCBegood mission consisting of 100 containers with 900 cans, plus 250 1-lb. flour bags. Adverse weather conditions prevented the completion of the second half of this mission before the time the KIMidow crew were scheduled for leave. The balance of this mission will be carried out immediately following their return.

b. [] and [] developed a system of air dispatch for BCBegood employing nets into which the small containers and their chutes are packed. After dispatch the nets are hauled back aboard the aircraft by means of their static lines and are kept for future use. They also devised a very efficient means of leaflet dispatch by packing them in the used cargo chute canvas covers and then throwing out several of these bundles at one attached to a static line. This allows the canvas covers to be used repeatedly and simply requires that they be repacked with leaflets. Nets are to be used to secure all cargo within the aircraft, before placing it on an electrically driven conveyor belt which carries the containers to the door and out.

c. Packing of the tin cans for future BCBegood operations continued. This is a most tedious and time-consuming job and can be compared to coaling ship in the British Navy when all hands must turn to until the job is done. It is hoped that Headquarters can supply an electrically driven canning machine for this work. Ref. ATIE 8323.

d. 21 January - First half of first 1952 leaflet drop was combined with first half of BCBegood. This consisted of 158,000 double cartoon leaflets, plus 5,000 standard QKPalings. Several previous attempts were made to stage this mission as a single drop but adverse winter weather caused the flight to abort or to be scrubbed at the last minute. The balance of this leaflet shipment will be dropped along with the second half of BCBegood upon the return from leave of the KIMidow crew.

2. Personnel

a. [] and [] attending DMIagic Intelligence course in HTStein.

TOP SECRET

TOP SECRET

SECURITY INFORMATION

- b. [] transferred to BGConvoy 15 January.
- c. Four KMWashoo W/T's continue in training here.
- d. [] visited BCBiddy and TPCredo and returned ICDrink 11 February.
- e. 15 February [] departed for three weeks TDY ZRMETAL and TPCREDO.

3. Operations

a. Four-man Willow Team brought back from frontier after several attempts at infiltration which failed due to unusual amounts of snow in the passes. They are being held here and will be dispatched on or about 1 April. This is an excellent team with high morale and they made every effort to carry out their mission but could not complete with the winter weather in the mountains.

b. [] and [] visited the KMWashoo frontier and invited as guests on a week-end shooting trip the L3Flake officers who handle the final phase of our land infiltrations. Our relations with these officers are excellent.

c. 14 February - Airlift scheduled to transport two KMWashoo doctors from TPCredo to HTExtotic for HBPardon.

4. Miscellaneous

a. BCFiend operational warehouse and packing station completed and inventoried.

b. BCFiend quarterly operational meeting scheduled for 25 February HTExtotic was postponed until after [] talks in BCBiddy.

c. Search continues for suitable agents for 1952 operations.

d. Plans have been abandoned for the forming of a second HBPardon as result of FRAN 0828, which eliminates HTEstein as an area for conducting such training. It is hoped that we may be able to eventually transfer such activities to North BGERuno.
